

VOICE-FIRST • HINGLISH

Speak your spend. We'll split it fairly.

Say a spend the way you'd say it to a friend — in Hinglish. Confirm a clean draft, and the app tracks categories, who owes whom, and when to settle up.

split always

WHY IT'S DIFFERENT

Built for how people actually talk about money.

Voice, not forms

Hold to record a spend the way you'd say it out loud — no dropdowns, no typing.

Confirmation is the trust layer

AI proposes amount, category, people, and date. Nothing saves until you say it's right.

Categories at a glance

Food, transport, rent, petrol — see where the month went in one bar chart.

Balances, plainly stated

"Rahul owes you ₹500" — clear language, then settle up in a tap.

HOW IT WORKS

From spoken spend to settled ledger.

01

Record or upload

Tap the mic and say your spend in Hinglish, or upload an audio clip.

02

Review the draft

Edit the transcript, amount, category, or people — voice gets things wrong sometimes.

03

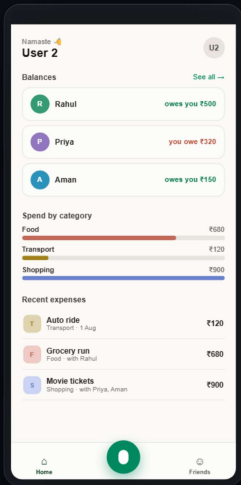

Confirm & track

It joins your category totals and friend balances instantly.

LIVE DEMO

Try it yourself

Fully interactive — record a spend, review the draft, add a friend, settle a balance.

Ready to stop typing your spends?

Scroll up and try the demo — no signup needed.
